## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 9 and 12 – 15, drawn to a method of coating an optical or eye element, classified in class 427, subclass 162.
- II. Claims 10 and 11, drawn to a coated optical element, classified in class 351, subclass 166.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made, respectively.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as (1) a process other than spin coating (e.g., dip coating, spray coating, flow coating, etc.), (2) a process that does not include washing and drying the optical element, (3) a process in which the curing is done with radiation (e.g., UV light) instead of thermally, (4) a one-step curing process, and/or (5) a two-step curing process in which the pre-curing step does not render the coating “tack-free”.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and

Art Unit: 1762

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. James Inskeep on 7/8/2004 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
